disabilitystudies.osu.edu

Disability Studies seeks to study the nature, meaning, and consequences of disability in a global culture from an integrated social, political, and cultural model. It incorporates historical, phenomenological, political, cultural, medical, sociological, technological, educational, and legal perspectives in order to provide an enriched and coherent view of disability as part of the universal human experience, by understanding and analyzing disability as a phenomenon that simultaneously manifests itself at the bodily, person, and societal levels. The minor is designed to provide a context for understanding the meaning and experience of difference in society by requiring students to examine how disability intersects with gender, race, class, age, and sexuality as well.

The Disability Studies minor consists of 14 credit hours of course work. At least six credit hours must be at the 3000 level or above. Once the disability studies coordinator has approved the Minor Program Form, you should file the form with your college or school counselor.

Required core (6 credit hours)
